JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

anything could, the mode of treatment of the subject; and, as to the scope of the book, it may be said that all the usual phenomena of light are described, and something of the theory given, though we do not find any reference to the recent investigations of Hertz and others showing experimentally the relation between light phenomena and those of electricity. Macmillan & Co. are the New York publishers.

—The Rev. Alfred J. Church, the well-known author of "Stories from Homer," etc., has written a novel of the time of Nero, which Macmillan & Co. will publish under the title of "The Burning of Rome." The book, which contains a number of illustrations, is just ready.

—"Principles and Practice of Plumbing," by S. Stevens Hellyer has just been issued by D. Van Nostrand Co., New York. It would seem that it might be difficult to find a person with sufficient knowledge of plumbing and having the habit of writing sufficiently developed who could produce a book on the subject. These two qualities are united in Mr. Hellyer, who is known for his earlier books, "The Plumber and Sanitary Houses," and "Lectures on the Science and Art of Sanitary Plumbing." The present volume is one of the series of "Technological Handbooks" edited by Sir H. Trueman Wood, Secretary of the London Society of Arts, to which Prof. William Crookes, for instance, contributed the initial number, on "Dyeing and Tissue-printing." The

opening chapters are devoted to lead and its many uses in building operations, but the rest of the book contains much on what is known as sanitary engineering, at least in so far as this may be limited to the house.

—Houghton, Mifflin & Co. have published a small volume entitled "Land of the Lingering Snow," by Frank Bolles, being an account of outdoor walks in New England in spring time. It is, therefore, somewhat in the style of Thoreau's works, though Mr. Bolles is hardly equal to his prototype. His work is almost entirely descriptive, with hardly any of those moral reflections such as often light up the pages of Thoreau. Moreover, it is too full of petty detail, as the following specimen passage will show: "Leaving the railway, I wound my way back towards Stony Brook, passing through groves of small oaks, meadows full of treacherous pools covered with brittle ice, belts of whispering white-pines, apple orchards and wood-roads leading up hill and down, ending nowhere. Four miles of this wandering brought me to Kendal Green station in Weston, with a record of twenty crows, eighteen chickadees, sixteen tree-sparrows and three blue jays" (p. 40-41). For lovers of nature, however, the book will have an interest, and it is written in a simple and refined style.

—The November number of the *Annals of the American Academy of Political and Social Science* is interesting on account of the number of articles it contains which discuss new ideas

NEO-DARWINISM AND NEO-LAMARCKISM.

By LESTER F. WARD.

Annual address of the President of the Biological Society of Washington delivered Jan. 24, 1891. A historical and critical review of modern scientific thought relative to heredity, and especially to the problem of the transmission of acquired characters. The following are the several heads involved in the discussion: Status of the Problem, Lamarckism, Darwinism, Acquired Characters, Theories of Heredity, Views of Mr. Galton, Teachings of Professor Weismann, A Critique of Weismann, Neo-Darwinism, Neo-Lamarckism, the American "School," Application to the Human Race. In so far as views are expressed they are in the main in line with the general current of American thought, and opposed to the extreme doctrine of the non-transmissibility of acquired characters.

Price, postpaid, 25 cents.

HANDBOOK OF METEOROLOGICAL TABLES.

By ASST. PROF. H. A. HAZEN.

127 pp. 8°.

Professor Waldo says: "I heartily recommend them to all workers in meteorology, and do not see how any of our American meteorologists can afford to be without a copy."

Professor Symons of London says: "They are unquestionably valuable helps, which must be kept handy, and replaced when worn out."

Price, postpaid, \$1.

BOOKS: How to Exchange them for others. Send a postal to the SCIENCE exchange column (insertion free), stating briefly what you want to exchange. SCIENCE, 874 Broadway, New York.

"The Week, one of the ablest papers on the continent."—*Descriptive America.*

THE WEEK,

A Canadian Journal of Politics, Literature, Science and Art.

PUBLISHED EVERY FRIDAY.

\$3.00 per Year.

\$1.00 for Four Months.

THE WEEK has entered on its EIGHTH year of publication, greatly improved in every respect, rendering it more worthy the cordial support of every one interested in the maintenance of a first-class literary journal.

The independence in politics and criticism which has characterized THE WEEK ever since its first issue will be rigidly maintained; and unceasing efforts will be made to improve its literary character and increase its attractiveness as a journal for the cultured home. Many new and able writers are now, or have promised to become, contributors to its columns, and the constant aim of the Publisher will be to make THE WEEK fully equal to the best literary journals in Britain and the United States.

As heretofore, PROF. GOLDWIN SMITH will, from time to time, contribute articles. London, Paris, Washington and Montreal letters from accomplished correspondents will appear at regular intervals. Special Ottawa Letters will appear during the sessions of Parliament.

THE WEEK being the same size as "Harper's Weekly," is the largest paper of its class on the continent.
